

NOMENCLATRURAL NOTES ON SOME MEMBERS OF THELYPTERIDACEAE. II

JAIDEEP MAZUMDAR AND RADHANATH MUKHOPADHYAY*

Department of Botany, The University of Burdwan, Burdwan-713104, India

Although the number of genera in the fern family Thelypteridaceae varies from 1-32, current concept is to treat nearly 950 species of Thelypteridaceae under 5 genera (Smith *et al.*, 2006). Hereunder, 345 species are formally transferred to *Cyclosorus s.l.* and new combination of nomenclatures has been suggested.

Keywords : Thelypteridaceae, *Cyclosorus s.l.*, new combinations.
